**NTM No 06 of 2021**

**18/02/2021**

NOTICE TO MARINERS

## **Perth Harbour – Snowmelt**

Following a period of significant snowfall within the Tay Catchment Area, and with ambient temperatures increasing, it is anticipated that the resulting snowmelt and additional rainfall will increase both the level of the River Tay and subsequently the flow rate.

As a result, all users who are active within the harbour limits, in line with NTM 03 of 2021 – Coronavirus (Harbour Restrictions), are advised of the potential for stronger currents, an increase in flow rate and floating debris/ice.

Ends.
